

Q1. Student Name: Dawoud Husain

Q2. Student ID: 1146816

Q3. Associated Team Deliverable: Sprint 2

Q4. Team #: 6

Q5. What were the main technical or methodological knowledge, skills and/or abilities (KSAs) that were required to complete this team deliverable? What prior courses or experiences (e.g. co- op, group project, etc.) from your Software Engineering degree did you draw on for these KSAs?(bulleted list is preferred):

A. Front end development with the MERN stack, namely creating/editing react components and linking them to their respective hook that calls a request to the backend

B. Backend development with the MERN stack namely creating a route, and a controller to add functionality to the site

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

I have not worked directly with the MERN stack before, however the previous sprint and especially the project proposal sprint where we investigated the code itself and the tech stack allowed me to have some previous knowledge before development.

Q7. Comment on your individual KSAs learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics / tasks in the future?

I had to read lots of stackoverflow and tutorials to resolve errors and understand how to create a deletion requisition for this sprint. For future

sprints I want to have a deeper understanding of react and its libraries to expand the site.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

- A. Added delete conversations functionality
 - Created a new react controller and route in the backend
 - Updated sidebar container and created associated hook in frontend
- B. Resolved add friend button error
- C. Updated sprints wiki + readme

Q9. With whom did you collaborate for any of the above contributions (be specific – saying “all team members” is not sufficient. State which parts you worked on with whom)?

- A. Individual
- B. Chaniza and Eddie created the frontend and the backend of the button, however I resolved a last minute error to allow it to work
- C. Individual

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

Overall my time management is a slight improvement over the previous sprints, I was able to close my gitlab issue about two days before the deadline.
