CIS 4250 – Software Design V
Instructor: Prof. S. Scott
Individual Accountability Report (IAR) Template

Note. Refer to the Project Manual for detailed instructions for IAR submissions.

Individual Accountability Report (IAR) Template
The following questions MUST be included and answered completely for each submitted IAR.

IAR must be submitted one of the following file formats: text or PDF.

Q1. Student Name: Ike Agbaje

Q2. Student ID: 1125093

Q3. Associated Team Deliverable: Team Contract + Project Proposal

Q4. Team #: 6

Q5. What were the main technical or methodological knowledge, skills and/or abilities (KSAs) that were required to complete this team deliverable? What prior courses or experiences (e.g. co-op, group project, etc.) from your Software Engineering degree did you draw on for these KSAs? (bulleted list is preferred):

- We applied our knowledge of documentation and collaboration from previous courses such as CIS*3250, as well as our ability to evaluate code when choosing a project that would be ideal for our group.

- We also applied knowledge of defining use cases from CIS*3750 when deciding how we would improve and build on existing functionality and features for our chosen application.

Q6. What was your existing level of experience with these topics/skills before your team began working on this deliverable? (1-2 sentences):

- I was already pretty familiar with these skills from my previous 4 software design courses and co-ops I've had, so I've had lots of experience with defining an idea and requirements for a project, as well as teamwork and collaboration.

Q7. Comment on your individual KSAs learning during this deliverable, and what additional learning may be needed to understand or be more competent with these topics / tasks in the future?

- There weren't a lot of technical KSAs learned this deliverable since it was just planning out the project idea, but the KSAs I had already were reinforced. For future sprints and deliverables, I plan to go over the code more to really understand what it does and how. I'm also not familiar with the tech stacks used so I need to do some more learning on those to better contribute to future deliverables.

Q8. What specific contributions did you make to this team deliverable? This should include technical or project management contributions.

- I completed my sections of the team contract and helped with documenting the project proposal, specifically the eligibility section.

Q9. With whom did you collaborate for any of the above contributions (be specific – saying "all team members" is not sufficient. State which parts you worked on with whom)?

- I worked with Jake, Eddie, Dawoud, and Naza on both the team contract and project proposal documents.

Q10. Comment on how well you managed your time over the time period allocated in the Course timetable to this team deliverable (i.e. the time between the prior team deliverable to this team deliverable).

- I think we managed our time pretty well. There weren't any prior team deliverables, but between the first week of classes and today, we were able to spread out our work over our meeting times to get it all done on time. We did have to make a lot of last-minute changes because many of our initial ideas either didn't meet the requirements or we couldn't get it running so we spent more time than we had planned doing project research and deciding on an idea, but we made it work.
